Re: Public Works 2016 Capital Improvement Projects (CIP) Plan and WaterOne Main Replacement

Dear Fairway Resident:

The City of Fairway's 2016 CIP plan includes the mill and overlay, spot curb replacement (as needed), driveway approach replacement (as needed on the east side) on Mission Road.

This program is the result of many years of planning and execution by your City Council and Department staff.

WaterOne will be replacing the water main along Mission Road prior to our contractor starting work. Our portion is still in the design phase and we are expecting to start construction this summer. We will follow up with an additional letter prior to our construction starting.

During WaterOne's construction, street and/or driveway access at times will be limited. Please refer to WaterOne's letter for schedule and contact information should you have any questions or concerns on the water main replacement.

Sincerely,

A handwritten signature in blue ink that reads "Bill Stogsdill". The signature is written in a cursive style and is followed by a horizontal line.
